Capping Solutions for the Bottling Industry

Warner Electric
Altra Industrial Motion
Warner Electric has provided magnetic headsets, permanent magnet clutches, brakes, and other products to many fine OEMs and users in the capping industry for over 20 years.

From capping carbonated soft drinks, bottled water, milk and juice, to ketchup, salad dressings, personal care products, and motor oil, reliable Warner Electric capping headsets, chucks, and anti-rotation knives have successfully improved the overall performance of capping operations around the world.

Warner Electric magnetic headsets feature constant smooth torque technology; differing with most competitor OEM headsets that have two opposing magnets causing pulsating torque. It’s the pounding effect of a pulsating clutch that increases cap tightness and torque variability during the capping process.

FEATURING SMOOTH TORQUE MAGNETIC TECHNOLOGY TO PROVIDE THE MOST CONSISTENT TORQUE CONTROL ON THE MARKET

Why Customers Choose Warner Electric

100% Interchangeable with major OEM headsets
No machine modification is required! (Alcoa [CSI], Zalkin, AROL, Fowler, Fogg, Federal, Portola, AMCO, Krones, KHS, and others)

Smooth Torque
Constant torque eliminates torque pulsations that cause cap over-tightening and provides less shock wear on machine components

Improved Efficiency
Smooth torque provides less variation in removal torque, improving end product quality & consistency

Longer Operation Life and Lower Cost of Ownership
Lower cost for new units & product design enables longer operating life than OEM headsets, enabling lower rebuild cost with fewer rebuilds

Easy to Set-up and Maintain
Visual setting scales for top load force and application torque

Excellent Service Expertise and Delivery
Service technician expertise capping machinery; single units ship within 2 days, 2-4 weeks for entire machine!

Call 1-888-350-1891 or visit www.cappingclutch.com
WARNER ELECTRIC’S UNIQUE PRODUCT DESIGN ENABLES LONGER LIFE FOR YOUR MAGNETIC HEADSET

Spring Cover
Keeps lubrication within the unit, extends the life of the top load components.

Grease Access Point
Easy to maintain. Lubricate the upper assembly every 500 hours.

Stainless Steel Construction, Quad Seal, and Drain Holes
The quad seal helps to protect the bearing from contaminants. The drain holes allow for an exit if any fluids get inside of the unit. These features combined with stainless steel construction enable the units to better withstand harsh environments, including caustic washdowns!

Visual Setting Scale for Application Torque
Easy to set up and maintain. This setting scale provides easy, accurate setting of application torque.

Visual Setting Scale for Setting Top Load Force
Easy to set up. This setting scale provides easy accurate setting of top load force.

Oversized Thrust Bearing
Specifically designed for the bottling industry with an oversized thrust bearing to handle the repeated downward thrust of capping, increasing bearing life compared to a standard radial ball bearing used by competitive models.

Smooth Torque Technology
Eliminates cap over-tightening, reduces variation in removal torque, and provides less shock wear on the system.

Grease Access Point
Keeps lubrication within the unit, extends the life of the top load components.

Warner Electric capping headsets are 100% interchangeable with major OEM models including:

- ALCOA (CSI)
- ZALKIN
- AROL
- FOWLER
- AMCO
- KRONES
- KHS
- FOGG
- FEDERAL
- PORTOLA

Push Button Torque Control
Optional Feature
Quick torque changeover.

* Some features not available with all Warner Electric Models.
TOTAL PRODUCTIVE MAINTENANCE

TPM focuses on keeping all equipment in top working condition to avoid breakdowns and delays in manufacturing processes.

Non-Metallic Sliding Joint
- Eliminates grease
- Reduces bacteria growth

Fixed Top Load Ring
- Feature locks out top load force to a specific value
- Reduced top load variability

High Performance Bearing
- Double row angular contact
- Stainless steel, viton seals, high temperature food grade grease
- Extended life

Smaller 3" Diameter
- Lower weight & inertia

Push Button Torque Change
- Quick torque changeover

Smooth Body Design
- More aseptic

Torque Lock Feature
- Feature locks out torque to a small range or specific torque value
- Reduced torque variability

Smooth Hysteresis Torque
- More consistent torque control
- Less wear on change parts

Lifetime Sealed Magnets
- Reduced maintenance costs
- Never need to be replaced!
Capping Packages Designed for Dairy Applications

Warner Electric has recently introduced new capping packages specifically designed for the dairy industry. These smooth torque hysteresis technology cap chucks are 100% interchangeable with the OEM capping machinery found in dairy plants today. Designed to provide maximum corrosion resistance in caustic washdown environments, Warner headsets are engineered to help you reduce maintenance costs and keep your dairy plants’ downtime to a minimum!

- Designed to withstand caustic washdown environments
  - Completely sealed unit prevents fluids from getting into the clutch
  - All Stainless steel construction
- Smooth torque technology provides more consistent torque, improving quality and efficiency
- Reduced plant downtime
  - Improved visual adjustment capabilities for application torque
  - Provides longer operating life than comparable OEMs
- Lower overall operating costs
- Cost-effective solutions with short lead times
- Quieter machine operation
- Chucks are easily cleaned
- Smooth torque eliminates bottle damage from kicker fingers

IMPROVE OPERATING LIFE AND INCREASE EFFICIENCY WITH WARNER ELECTRIC ANTI-ROTATION KNIVES

- Manufactured from highly corrosion resistant hardened stainless steel material
- Unique five point knife designed to last longer than other anti-rotation knives
- Three hardness levels available to fit your application requirements
- Hardness levels up to 78 Rc
- 100% interchangeable with OEM anti-rotation knives
- Quick delivery
WARNER ELECTRIC IS YOUR ENGINEEREED CAP CHUCK SOLUTION

- Chucks engineered to fit your cap profile
- Manufactured to be 100% interchangeable with existing OEM chucks
- Manufactured from highly corrosion resistant hardened stainless steel material
- Unique cap chuck pin designed to better grip your cap
- Competitively priced and short lead times
- Experienced in providing quality chucks for new low profile cap applications
- Our extensive design experience has enabled us to engineer our chucks to reduce cocked caps

**Fixed Chucks**
- Simple design, least amount of wearing parts
- Low maintenance
- Low inertia
- Short lead times

**Quick Connect Chucks**
- Quick changeover ideal for multiple package sizes or frequent cleaning
- Designed for any OEM headset to meet your application needs

**Mechanical Chucks**
- Ideal for multiple cap sizes, difficult cap grip applications, and smooth caps
- Hardened stainless steel used in key wear areas
- Competitively priced

Call 1-888-350-1891 or visit www.cappingclutch.com
IMPROVE OPERATING LIFE AND INCREASE EFFICIENCY WITH WARNER ELECTRIC

Improve Production Efficiency & Quality
- Smooth Torque Technology enables Warner headsets to provide constant torque, eliminating over tightened caps and significantly reducing variation of removal torque.
- Smooth Torque also provides less shock on the system, enabling longer life of machine components, especially chucks & retention knives.

Lower Costs and Quick Delivery of New Headsets, Chucks, & Knives
- Competitive pricing on new units and quick deliveries ensure that you are receiving a quality product at a good value when you need it.

Fewer Scheduled Rebuilds with a 7000 Hour Maintenance Interval
- Rebuilds don’t have to be done as frequently (~2X the life of competitive headsets!) saving you even more time and reducing overall maintenance costs.

Less Time to Set up and Rebuild
- Reduced maintenance costs through a much simpler rebuild procedure. Faster to take apart and rebuild compared to major OEM competitive headsets (approximately 1/2 the time to rebuild).

REBUILD OPTIONS FOR WARNER ELECTRIC MAGNETIC HEADSETS

Headset Rebuild Kits: Low cost, easy to rebuild in house!
- Bearing kits and magnet kits in stock

Headset Factory Repair Program: Low cost, quick turnaround!
- Ship headsets back to Warner Electric for a full factory rebuild and certification

Headset Exchange Programs: Choose the program that best meets your needs!
- Complete exchange program options available for magnetic headsets
- Multi-year exchange programs enable customers to receive rebuilt Warner headsets at predetermined times during the year in exchange for their used headsets

On site Service Technician Support: Get extra help when you need it!
- On-site service support is available for installation of new Warner headsets, rebuild support of existing Warner headsets, training, etc.
- Our factory-trained and certified service department with over 50 years combined experience can help prevent costly delays and down time of your capping operation
